

## Consent Form for Pre-Anesthesia Blood Work & Optional Procedures

Your pet is being hospitalized for surgery/treatment. This blood screen includes indicators of anemia, dehydration, kidney and liver functions. These abnormalities may be present at **any age** and may not be evident on physical exam. If present, abnormal organ function could create complications during surgery or treatment. The cost for this blood screen is **\$39.00**

**Please indicate if you want the blood screening test by checking Yes or No and signing on the line.**

YES - Perform the blood screen.       NO - I decline the blood screen & accept the increased risk of complications.
